Food Ordering Website.

📅 2024 📍 Bhaktapur

I will be working on the frontend development of a food ordering website at the training center. This project involves designing the user interface, ensuring it is visually appealing and easy to navigate. I'll be using technologies such as HTML, CSS, and JavaScript to create responsive and interactive pages where users can browse menus, place orders, and view their cart. The goal is to build a seamless and engaging user experience.
